Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those

models, and an explanation of the rating system? Yes

Website address: <http://www.cincinnatiatibell.com/hac>

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: CBW ensures that information related to the hearing aid compatibility of a particular handset is available to customers at its retail outlets as well as via its website. Additionally, CBW will make this information available to organizations that assist persons with hearing disabilities as appropriate.

Methodology for Functionality Levels

CBW has devised a good/better/best rating system to assist customers in determining which CBW handset will best meet their needs. Handsets are separated into each category based on the following three criteria: 1) the HAC rating, as certified by the handset manufacturer, 2) available handset features (e.g. voice, camera phone, WiFi capability, etc.) and 3) the manufacturer's suggested retail price. It's best to try several models before buying to find the best match for use with your hearing aids. The rating system is available on CBW's website at www.cincinnatiatibell.com/hac.
